

V. SUMMARY AND RECOMMENDATIONS

At the request of the Delaware Department of Transportation, The Louis Berger Group, Inc., conducted architectural investigations as part of the preliminary planning for the proposed rehabilitation of Bridge 88. The bridge carries Snuff Mill Road (Road 244) over Burris Run, a tributary of Red Clay Creek, in Christiana Hundred, New Castle County, Delaware. The purpose of the study was to identify architectural resources within the APE that are currently listed in or eligible for listing in the National Register of Historic Places.

The architectural survey identified one previously inventoried resource more than 50 years old within the APE, the Brown-Garrett House (Shadowbrook Estate Gatehouse; N-1133), and evaluated this resource with regard to its National Register eligibility. Supplementary Delaware CRS documentation was prepared for the Brown-Garrett House, which was found eligible for listing in the National Register under Criterion C.
